0 10 254 Arduino Serial Port Not Found Arduino Serial Port Not Found For the past week I have been programming an arduino uno with a computer running windows 7.. I had the same problem! Diamond 300mbps wireless repeater manual Doesn't say anything about network address ranges.. The Diamond quickstart guide made it so very easy just disable wifi, attach the cable and enter 10.. When I first started I found the device on Com 6 and was able to upload code no problem.

Did you select the right one from the Tools > Serial Port menu? The Serial port menu though is grayed out.. To find the repeater, you need to manually assign an IP address in your IPv4 settings.. Make sure there is no other MATLAB arduino object for this board For troubleshooting, see Arduino Hardware Troubleshooting. [Fl Studio Kick Download](#)
